

Machinability will supply the right equipment for all your snow plowing requirements.

Agricultural Tractors • Loaders • Skid Steers

PLOW MODEL	10SW35	8SW35
Plow width [ft]	10 ft	8 ft
Overall height [inch]	37	37
Base plow - straight width [inch]	120	96
Plow angle range [degree]	60	60
Base plow - angled width [inch]	101.5	81.5
Overall width - side wings forward or back [inch]	128	104
Overall width - wings extended [inch]	180	156
Cutting edge vertical angle [degree]	28	28
Cylinder bore [inch]	2.5	2.5
Trip Springs	10	8
Approx weight with A-Frame [lb.]	1830	1770
Swivel plate angle [degree]	14	14
Cutting edge vertical drop/raise at outer edge [inch]	15	12

All specifications are approximate. Machinability reserves the right to make changes in specifications and/or improvements at any time without obligation or notice.

MACHINABILITY

POWER SIDEWING PLOW

with Tripping Edges

Indispensible Features

You'll appreciate Machinability's Power Side Wing Plow with cutting-edge technology offering faster, safer snow removal. Our electronic Touch Button Controls provide infinite variable movement of the plow sections. Our innovative front mount design ensures level plowing at all times.

Cutting-Edge Design

By combining unsurpassed strength and weight saving construction, our multi-positional, hydraulic-powered plows are second-to-none. The aggressive 28 degree cutting-edge angle cuts hard packed snow with no down pressure and the 35" moldboard rolls snow, easily out-plowing the competition.

Our leading-edge hydraulic valve and joy stick control are designed with all settings built in for maximum system efficiency including impact relief protection. Completely operational at the mere touch of a button.

- 1 Versatile, reinforced, lightweight, fully boxed A-Frame specifically designed for your equipment.
- 2 Heavy-duty, lightweight, double-walled moldboard with continuous welds inside and out.
- 3 Heavy duty wear shoes with optional high wear carbide.
- 4 All locking pins are hardened and fully greasable.
- 5 Large hydraulic cylinders have forged clevis and 1.5" shafts with double plating. All components are fully serviceable for extended service.
- 6 Moldboard curvature and design eliminate snow/ice build-up while providing exceptional snow casting with less Horse Power and better fuel efficiency!
- 7 Support ribs provide extra strength and lightweight construction. Lifting lugs allow for safe, easy handling.

- 8 Fully serviceable trip edge with torsion springs.
- 9 A single pressure line operates the hydraulic valve and 10-function electronic joy stick control providing impact protection, free float and complete plow operation.
- 10 Independent, boxed side wings are operational in any of the 180 degree positions and come with internal trip edge and spring providing for smooth operation and maintenance.
- 11 State-of-the-art, progressive linkage design incorporating heavy duty components with just one cylinder.
